

# Vacant Office Space Monthly Report

Tokyo | July 2025

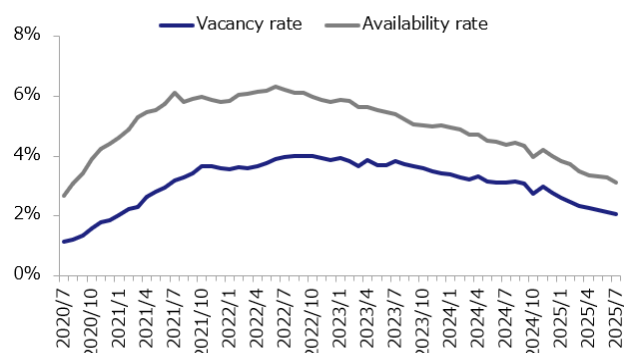

Aug 5, 2025

(1 tsubo = approx. 3.3 sqm)

Vacant office space data of the 23 wards of Tokyo in July 2025 were as follows:

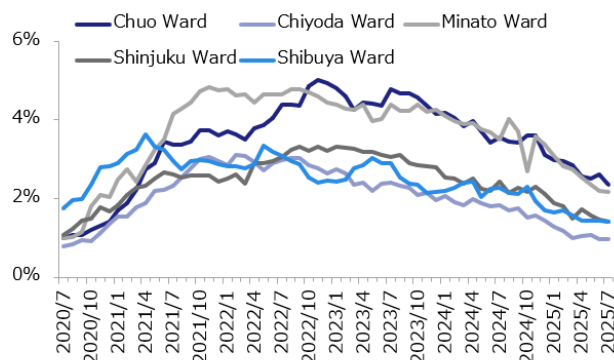

- The **vacancy rate** in July 2025 was 2.06%, down 0.09pt from the previous month. The **availability rate** was 3.13%, down 0.15pt from the previous month (Figure 1).
- The **vacancy rate among the 5 central wards** was highest in the Chuo at 2.35%, and lowest in the Chiyoda at 0.96%. The vacancy rates in all wards decreased. (Figure 2).
- **Vacant space** was 169,000 tsubo, decreasing 2,500 tsubo from the previous month (Figure 3).
- In terms of the **increase and decrease in vacant space**, the increase was 35,000 tsubo and the decrease was 60,000 tsubo. The decrease exceeded the increase (Figure 4).

Figure 1: Vacancy & Availability Rates (23 Wards, All Sizes)

	2025/3	2025/4	2025/5	2025/6	2025/7
Vacancy rate	2.33%	2.26%	2.20%	2.15%	2.06%
Availability rate	3.50%	3.37%	3.31%	3.28%	3.13%

Figure 2: Vacancy Rate (5 Central Wards)

	Chuo	Chiyoda	Minato	Shinjuku	Shibuya
2025/6	2.60%	0.97%	2.20%	1.45%	1.44%
2025/7	2.35% ↓	0.96% ↓	2.16% ↓	1.40% ↓	1.42% ↓

Figure 3: Vacant Space (23 Wards, All Sizes)

	2025/3	2025/4	2025/5	2025/6	2025/7
Vacant space	219,000	207,000	199,000	194,000	169,000

Figure 4: Increase & Decrease in Vacant Space (23 Wards, All Sizes)

	2025/3	2025/4	2025/5	2025/6	2025/7
Increase (tsubo)	28,000	47,000	31,000	30,000	35,000
Decrease (tsubo)	45,000	59,000	39,000	35,000	60,000

- The **vacancy rate by area** was 1.72% in the 5 central wards, and 3.11% in the 18 peripheral wards. The **availability rate** was 2.76% in the 5 central wards, and 4.27% in the 18 peripheral wards (**Figure 5**).
- The **vacancy rate by building size** was 1.97% among large buildings (gross floor area (GFA) of 5,000 tsubo or more), and 2.15% among small & medium buildings (GFA of 300–less than 5,000 tsubo). The **availability rate** was 3.06% among large buildings, and 3.21% among small & medium buildings (**Figure 6**).

Figure 5: Vacancy &amp; Availability Rates (by Area)

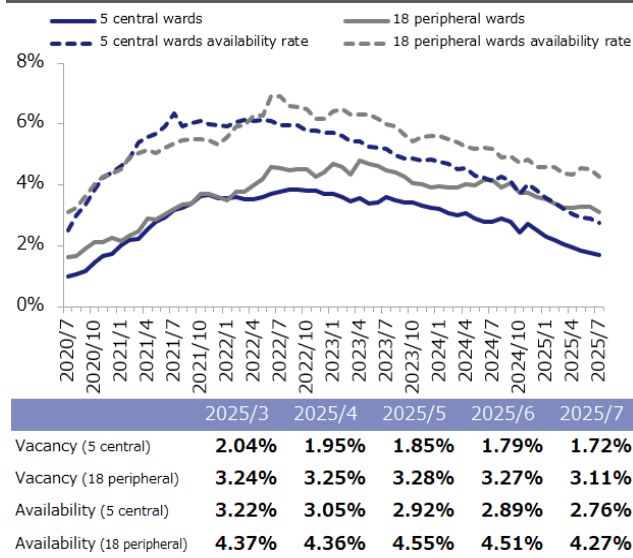

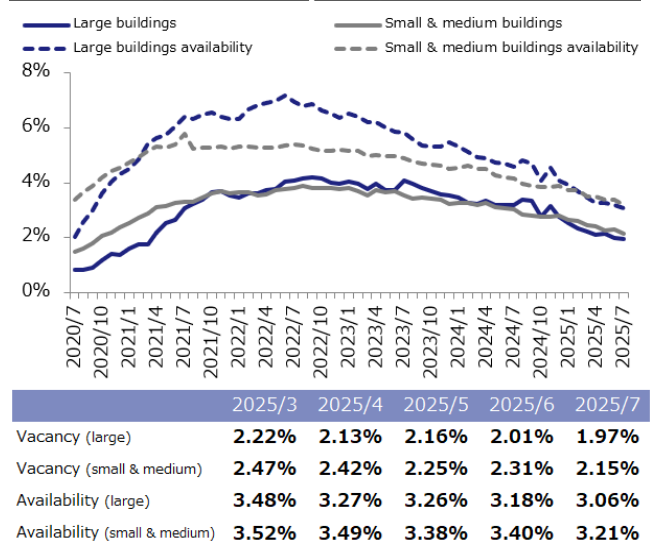

Figure 6: Vacancy &amp; Availability Rates (23 Wards, by Size)

Survey Overview	
Target buildings	Usage: Office buildings    Area 23 wards of Tokyo    Size GFA of 300 tsubo or more
Data source	Data of available vacant space and buildings, independently collected by Xymax
Calculation method of vacancy and availability rates	<ul style="list-style-type: none"> <li>• Vacancy rate = vacant space ÷ rentable area</li> <li>• Vacant space: Total available vacant space in completed buildings as of the time of survey</li> <li>• Rentable area: Rentable area of completed buildings as of the time of survey</li> <li>• Availability rate = available space ÷ rentable area</li> <li>• Available space: Total available space, which consist of vacant space and space for which notice of cancellation has been given</li> </ul>
Calculation method of increase & decrease in vacant space	<ul style="list-style-type: none"> <li>• Increase in volume of vacant space:               <ul style="list-style-type: none"> <li>a. Space in existing buildings formerly occupied by tenants; b. Total rentable area of new completions</li> </ul> </li> <li>• Decrease in volume of vacant space:               <ul style="list-style-type: none"> <li>a. Space in existing buildings leased under a new agreement; b. Space in new completions for which lease is signed prior to completion; c. Space that had been vacant but the owner decided not to lease</li> </ul> </li> </ul>
Remarks	Where rentable space is not available, the rentable area is estimated from the gross floor area of the building using a formula developed in a joint study with the laboratory of Professor Naoki Kato at Kyoto University Graduate School of Engineering.
